PREFACE.

THE following list of English Tales and Romances is divided into two parts, the first containing all books which appeared up to the year 1642, the outbreak of the Civil War, the second containing all books which first appeared between that date and 1740. This plan has been adopted, primarily in order that Part I may fall into line with the Lists of English Plays and Translations from the Classics already issued by the Society; and secondarily in the hope that the division of the mass of material may sensibly diminish the incongruous juxtapositions inevitable in any author-catalogue, and may thus bring into light the historical perspective, which is still to a great extent, and would otherwise have been entirely, obscured by the alphabetical arrangement under the authors' names.

It may be well to add here that in the references to libraries, etc., given at the end of each entry, the following order of precedence is observed: (1) British Museum, (2) Bodleian, (3) University Library, Cambridge, (4) any other public library, preferably in England, (5) catalogued and accessible private libraries, such as the Bridgewater or Huth collections (the latter now no longer appropriate to this category), (6) other private libraries, and (7), failing an accessible copy, a reference to some authority for the book's present or past existence. A reference to a library means that a copy has not been found in a library higher in the list (as regards the later period a reference to a source placed lower may not always exclude the presence of a copy in the University Library, Cambridge);

but it does not imply that copies may not exist in any or all of the classes named below it ; thus, "B.M." does not mean that the book may not also be in "Bodl." or "U.L.C.," but "U.L.C." does mean that it is not in "B.M." or "Bodl." But I am not so sanguine as to suppose that I have been quite consistent.

In the time, by now unduly protracted, in which this compilation has been accumulating in my hands, I have experienced my full share of that "mutual help and comfort," which it is the honourable tradition of librarians and other students of literature to afford. Of the Society's two Hon. Secretaries it is Mr. Pollard who first suggested and assisted the commencement of the collection, and Mr. McKerrow who has edited the result. Our Treasurer, Mr. Graves, very kindly gave me entries for books preserved at Britwell, and Mr. Collmann settled some queries relating to them for me. Dr. Henry Thomas gave useful help in dealing with translations from the Spanish. At Oxford and Cambridge I owe thanks to most members of the libraries' staffs, but especially to Miss F. O. Underhill of the Bodleian, and at Cambridge to Mr. C. E. Sayle of the University Library, and for Pepysian entries to Mr. S. Gaselee ; while Mr. Martin Hardie has helped me with notes on books in the Forster and Dyce collections at South Kensington, and Mr. W. K. Dickson with the Arbutnot tracts in the Advocates' Library. At a rather early stage Professor F. Ives Carpenter, of Chicago, examined the whole of my material, and made many additions ; and my proofs of Part I were very kindly read by Professor Friedrich Brie, of Freiburg, who, I hope, found in them some suggestions, in return for those that he made, towards his forthcoming work on that period.

INTRODUCTION.

LIST of earlier English Tales and Romances may seem at first sight to have a well-defined scope; but on many sides it needs definition, and it is necessary to draw round it frontier-lines, which, like those of kingdoms, are at times natural and at times arbitrary. Even the distinction between prose and verse becomes occasionally, as in some mixed Elizabethan pamphlets, not very easy to follow; this limitation, by excluding the early-printed mediæval verse-romances, has very much reduced both the labour and the value of this list. A harder line to draw is that between books of tales and books of anecdotes. Jest-books are only included when they have at least one unity, that of a single hero; this admits *Howleglas* and the *Jests* of Skelton and Peele, among others, which border too closely on the picaresque stories to be excluded. Fables are also admitted. But the most essential limitation lies in the fact that these are *early* English Tales and Romances. The adjective *early*, like other adjectives, is relative; it was necessary to find some closing limit of date if possible less arbitrary than others. This limit was really fixed for me at 1740 by the critics, more numerous perhaps than eminent, who have called Richardson's *Pamela*, which appeared in that year, the first English novel; the Society now has before it, as a corrective to this opinion, a sufficiently substantial list of the English novels which preceded the first. But a better limit, as increased familiarity with the material shews, would have been the Revolution of 1688, or if a year could have been chosen, about a decade earlier, 1675 perhaps, the bicentenary of Caxton's *Troy* book. The long French

romances had run their course, and the flood of scandalous novelettes had not begun. The consolation for the presence of these and other valueless trifles must be found in headings such as those of Bunyan, Defoe, and Swift.

The discussion of the date at which such a collection as this should end might well be interminable ; but the date at which it should begin is simple ; it begins with the first book printed in the English language. Caxton did well in choosing the tale of Troy divine for the first work of his press. For the period of nearly three centuries that we are now concerned with his version of it never lost hold of the English mind. His Bruges edition was followed by Wynkyn de Worde's of 1502-3, then, after a long gap which we must suppose to have been filled by lost editions of de Worde, Copland and East as well as by Copland's extant edition of 1553, it was reissued by Creede in 1596, "newly corrected, and the English much amended." After this there followed at regular intervals no fewer than eighteen editions, and in 1728 it was rewritten, being distinguished by the title *the New History of the Trojan Wars*, and a drama on the subject added. Caxton's next choice was not so happy ; from Le Fevre's *Recueil* he turned to the same author's *History of Jason*, of his version of which there are only two extant editions, the second being printed in 1492 at Antwerp by Gerard Leeu. The mediæval *Godfrey of Bouillon*, which followed in 1481, was never reprinted ; but *Reynard the Fox*, which appeared in the same year, was a better selection ; for a reprint by Caxton himself survives, Pynson printed it twice, probably near the turn of the century, and then, after one surviving edition and two appearances in the licences of the Stationers' Company (in 1560 and 1586), it reappears in 1620, like the Troy book revised, and was constantly reprinted to the end of the period. Degulleville's allegory, *The Pilgrimage of the Soul*, 1483, came next, but was not reprinted. Caxton's success with the famous beast-fable of Reynard may perhaps have contributed to encourage him to return to this kind of book, which he did in the next year, 1484, by translating and printing the fables of Æsop ; but the celebrity of Æsop as an

elementary Latin reading-book (almost the only amusing one then known) makes it rather to be wondered at that it did not precede the others. Caxton's version, which also contains the fables of Avianus, Alphonso and Poggio ("Poge the Florentine"), held the field for a century, and was printed so late as 1700 among all the rival versions which multiplied as time went on, from that "in tru Ortögraphy with Grammar-nótz" by William Bullokar in 1585 to those by Hoole and L'Estrange. In the next year, 1485, came three mediæval romances, *Charles the Great*, which was not reprinted, *Paris and Vienne*, and, most important of all Caxton's prose books, Malory's *Morte d'Arthur*, the only perfect copy of which has recently changed hands. *Paris and Vienne* was reprinted at Antwerp by Gerard Leeu in 1492, and by Wynkyn de Worde and Pynson early in the next century, and then (though it was licensed in 1586) no edition is extant till those of Mainwaring's Jacobean version, of which there were three editions between 1621 and 1650. Malory's book had a more continuous popularity, unless the explanation of the fact that a greater number of editions of it are extant be merely that its greater bulk has preserved more copies from destruction; it was reprinted in 1498, 1529, 1557, twice about 1580, and, once more, in the revision of 1634. Except for two editions of a chapbook abridgement by the industrious John Shurley, entitled *Britain's Glory*, which appeared just half a century later, in 1684, this was the last to be heard of Malory till his revival in the nineteenth century.

After this valuable gift to English readers, Caxton produced only three more books which concern this list; they are all undated, but all were printed about 1489 or 1490. These are two more mediæval romances, *Blanchardine and Eglantine* and *The Four Sons of Aymon*, and *Eneydos*, a condensation in prose of the Aeneid. This last was never reprinted, so far as we know, but we have an edition of *Blanchardine and Eglantine* by Wynkyn de Worde and then, as in the case of so many of these early books, two revised editions at the end of the sixteenth century, while of *The Four Sons of Aymon* there were reprints in 1504 and 1554 and licences

in 1581-2 and 1598-9, whether more than merely provisional there is no copy extant to tell us.

On the whole, then, we may say that our first printer showed good judgment of the public favour as well as good personal taste when he selected his books for printing. Only *Godfrey of Bouillon*, *Charles the Great*, *Eneydos*, and Degulleville's *Pilgrimage of the Soul* were not reprinted; though the last was re-written in verse thirty years later, and one, Lefevre's *Jason*, did not survive the fifteenth century. All the rest were really popular, and form a noble contribution to our national literature.

Caxton's followers, Wynkyn de Worde, Pynson, Wyer, and Copland, produced for the most part, apart from their reprints, less important books; it is not easy to see why Caxton did not himself venture on some of them, which were certain of a sale, though of course it is always quite possible that he did and that his editions of them are lost to us. This is specially the case with Mandeville's *Ways to the Holy Land*, which would have paired not unworthily with the *Morte d'Arthur*; apparently it was left to Wynkyn de Worde, whose edition of 1499 is the first known. Indeed, with Caxton's business, his mantle as producer of romances had fallen on de Worde; we owe to him *The Three Kings of Cologne* and *Robert the Devil*, both about 1500, *The Destruction of Jerusalem* (of which, however, there is an edition, also undated, by Pynson), *Ponthus of Galyce*, 1511, *Helyas*, 1512, *Joseph of Arimathea*, the *Gesta Romanorum*, and the *Seven Wise Masters*, all undated but of about this time, the last two being surely notable omissions on the part of Caxton, and *Oliver of Castile*, 1518. The most striking feature of this list is perhaps its complete mediævalism. Renaissance literature has not begun in England yet, except for More's *Utopia* and Elyot's *Book of the Governor*, not much of an exception, for the former was published abroad in Latin in 1518, and the latter's interest for us is confined to the presence in it of Boccaccio's tale of Titus and Gisippus. Before the turn of the fashion, which came rather after the middle of the century, we have a few more older books to chronicle. Jan van Doesborgh printed five of these

at Antwerp in about 1520, three of them translations from Teutonic tales of secondary importance, *Frederick of Jennen*, *Mary of Nennmegen*, and *The Parson of Kalenborowe*, the other two being the mediæval story which tells "the lyfe of Virgilius and of his deth and many maruayles that he dyd in "his lyfe tyme by whychcrafte and nygramansy thorowgh the helpe of the "deuyls of hell," and the more important German jest-book of *Till Eulenspiegel* or *Howleglas*, both of which were reprinted, the latter twice, by Copland; *Howleglas* also reappeared after a long effacement in 1720, entitled, in the picaresque fashion which it had in some sense heralded, *The German Rogue*.

At about this time, in 1521, Pepwell printed Christine de Pisan's allegorical *City of Ladies*, and ten or fifteen years later Wyer printed her *Hundred Histories of Troy*; but both these books belonged to the age that was passing away, and not to that which was opening, and neither is known to have been reprinted. But among the English men of letters of this generation there is one who faces both ways. This is John Bouchier, Lord Berners, now most celebrated for his version of Froissart, but who also translated not only that favorite Renaissance moralist, Guevara, but, more to our purpose now, two mediæval romances; these are *Arthur of Little Britain*, first printed in about 1535 and revised in 1581, and the beautiful story of *Huon de Bordeaux*, which reached a third edition in 1601; to these must be added another translation, San Pedro's short allegorical story, *The Castle of Love*. *The Castle of Love* escaped the fate of the same author's *Arnalt and Lucenda*, which was published in 1575 as a text-book of Italian, with English and Italian versions on opposite pages, by Claude Desainliens, a teacher of languages, who anglicised his name to Hollyband. The same fate had earlier attended another Spanish love-story, Juan de Flores' "Historie of Aurelio and of Isabell, daughter of the Kinge of Schotlande, nyeuly translatede in foure langagies, Frenche, Italien, Spanishe, and Inglishe," published at Antwerp (which probably accounts for the spelling) in 1556. This story was licensed in England in 1556, in French, Italian, and English, and again in

1588 in the four languages ; it was reprinted at Brussels in 1608, and a new English version appeared in 1606 under the title of "A Paire of Turtle Doves: or the Tragicall History of Bellora and Fidelio," which has been attributed in error to Greene and is here identified.

Copland, for all his industry, added only one tale, that was not a mere reprint, to the national stock, and even this was itself an old story, being the *Historia de duobus amantibus* of Aeneas Silvius. A secular production for one who was to be a Pope, it belongs to the class of Boccaccio's *novelle* ; beside it stand the version of Boccaccio's Titus and Gisippus in Elyot's *Book of the Governor*, and two translations in verse, his *Tuncred and Sigismund*, long known on the Continent in the Latin version by Leonardo Bruni Aretino, and Bandello's *Romeus and Juliet*. These three tales, though not products of the new age, may perhaps be taken as marking the transition in the taste of English readers, and pointing their attention to Italy.

The half-century that followed was in the West of Europe and not least in England the age of the Italian supremacy ; yet the number of Italian romances or novels translated or adapted for English readers was not so large as might be expected. The *Decameron* itself was not published in English as a whole until the end of James I's reign, though an attempt by John Wolfe to produce an edition of the original Italian was vetoed by authority. The explanation of the comparative slowness of the output of translations may perhaps be suggested by this incident of Wolfe's projected edition of the *Decameron* in its native tongue ; for the great majority of educated Englishmen could read Italian, and preferred to read their Boccaccio and Bandello in Italian, much as most people of our time prefer to read Anatole France in French.

To turn to what did find its way into English, there was a version in 1592 of the first half of the celebrated *Hypnerotomachia*, with not impossibly unworthy imitations of the woodcuts. The regular books of novels began with Painter's *Palace of Pleasure*, 1566, which was followed

in succession by Fenton's *Tragical Discourses*, 1567, Guicciardini's *Garden of Pleasure*, 1573, Pettie's *Pettie his Pleasure*, 1576, Wotton's *Courtly Controversy of Cupid his Cautels* (which is a Pentameron), 1578, Rich's *Farewell to Military Profession*, 1581, Whetstone's *Heptameron*, 1582, and Warner's *Pan his Syrinx*, 1584. These regulars were reinforced by light-armed allies, books of mixed genre, containing letters and verses, such as Gascoigne's *Posies*, 1572, which contains an original roman-à-clef in the Italian manner, Tilney's *Discourse of Duties in Marriage*, 1568, Whetstone's *Rock of Regard*, 1576, and other books of the kind.

Though some of these collections were reprinted in the last decade of the century, and Marguerite de Navarre's *Heptameron*, which may be classed with its Italian sources, was not translated till 1592, yet the fashion yielded very quickly to the conquering progress of Lyly's *Euphues*. This strange and attractive book had just that originality which can be combined with popular success, the original combination of familiar but scattered qualities. Its balanced antitheses and assonances were already popular in Pettie, where they waited in the rough the polish that only the very young stylist of self-conscious culture often cares to give. The pithy proverbs were the stock in trade of the ordinary Englishman. The extreme morality appealed to the growing Puritanism of the time. The classical and pseudo-classical allusions served to attract the scholarly, and still more no doubt those who liked to think themselves so. And the constant discussions of education, of friendship, of love, of most other things, were in the taste of a generation of readers that knew Hoby's *Castiglione* and Elyot's *Governor*. The success of *Euphues* was immense. It appeared in 1578, and was constantly reprinted for nearly half a century. But early in its career it had rivals, in the shape of the short pastoral and other tales by Greene and Lodge, which followed its appearance closely, while a decade later it was overshadowed by Sidney's *Arcadia*. Sydney despised Euphuism as

talking of beasts, birds, fishes, flies,
playing with words and idle similes,

though he was but substituting for it a convention as artificial; but Greene

and Lodge were as much influenced by Lyly in style, as they (and Sidney) were by the Greek pastoral romances; and they both adopt the moralising vein, especially on their title-pages. And both sometimes also placed on their title-pages catch-penny appeals to the popularity of *Euphues*: Greene has *Euphues his Censure to Philautus*, and *Menaphon*, *Camilla's alarum to slumbering Euphues*, while Lodge, besides *Euphues' Shadow*, *the Battle of the Senses*, gave his famous *Rosalynde* the sub-title, in 1612 transformed into the first title, of *Euphues' Golden Legacy*. Anthony Munday followed their example in *Zelauto*. It may be worth while to see, by means of an abstract of a chronological table which I had the curiosity to make, how the popularity of Greene and Lodge lived and died with that of Lyly.

Euphues appeared in 1578 and had gone through four editions by 1582. In 1583 Greene published his *Mamillia*, in 1584 Lodge appeared, and Greene brought out four more books, in 1585 came one Greene, in 1587 no fewer than five, in 1588, 1589, and 1590 two, in 1590 also Lodge's *Rosalynde*, in 1591 a Greene and a Lodge, in 1592, the year of Greene's death, three of his and Lodge's *Euphues' Shadow*, in 1593 and 1596 a Lodge each. Twenty-nine books by the three had been published by 1596; many had already been reprinted, while eleven had been weeded out by popular judgment, and had appeared for the last time, among these being all Lodge's except *Rosalynde*. After 1601 there is a short gap, *Rosalynde* and *Euphues* appearing in 1604 and three Greenes in 1605, *Euphues* and a Greene in 1606, three in 1607, two in 1608, and five in 1609, these years seeing three expire; the years 1610–1613 produced one apiece, 1614 two, 1615 one; in 1616 and 1617 there was a revival, nine being reprinted. These, the only survivors of the original 28, were *Euphues*, *Rosalynde*, and, of Greene's, beside *Pandosto*, which had a green old age before it, *Arbasto*, *Ciceronis Amor*, *Euphues' Censure to Philautus*, Greene's *Groats worth of Wit*, *Menaphon*, *Philomela*, and *Never Too Late*. In 1626 *Arbasto* disappears, in 1628 *Ciceronis Amor*, in 1631 *Philomela* and *Never Too Late*, in 1634 *Menaphon* and *Euphues' Censure to Philautus*, in 1636 *Euphues*, in 1637 Greene's *Groats worth of Wit*, and in 1642

Rosalind. After that year, the year of the outbreak of the Civil War, none of these books were reprinted except *Pandosto*, called in its later editions (of which there were not less, and probably many more, than twenty-four), *Dorastus and Fawnia*. This one tale alone had been found to suit the taste of different generations; the rest suffered the common fate at last. That Lyly at least was being forgotten between 1630 and 1640 we can see from the address to the reader which Edward Blount the publisher prefixed to his edition of Lyly's plays in 1632.

"Reader, I haue (for the loue I beare to Posteritie) dig'd vp the Graue of a Rare and Excellent Poet, whom Queene Elizabeth then heard, Graced, and Rewarded. These Papers of his, lay like dead Laurels in a Churchyard; but I have gathered the scattered branches vp, and by a Charme (gotten from Apolle) made them greene againe, and set them vp as Epitaphes to his memory.

"A sinne it were to suffer these Rare Monuments of wit, to be couered in Dust, and a shame, such conceipted Comedies, should be Acted by none but wormes . . . Our Nation are in his debt for a new English which hee taught them. *Euphues* and his *England* began first, that language: All our Ladies were then his Schollers; And that Beautie in Court, which could not Parley Euphueisme, was as little regarded: as shee which now there, speakes not French."

It is clear that Blount himself was in Lyly's debt for an English by then far from new, and still more clear that, though he is referring to the Comedies, and though *Euphues* had been printed in the preceding year and was to be printed once again four years later, yet he was a forgotten author revived in consideration of the interest which the past generation had found in him.

Euphuism was only a phase in our literature; Arcadianism left a deeper mark. The *Arcadia* was printed eighteen times between 1590 and 1725; it was continued in 1607 and 1613 by Gervase Markham, in 1624 by Richard Beling, whose Sixth Book is included in all later editions, in 1651 by Anne Weamys. An abstract appeared in 1701 and the whole story was modernised in 1725. Moreover the story of Argalus and Parthenia, besides being versified by Francis Quarles, was separately adapted as a chapbook in 1672 and frequently reprinted in the next generation. The *Arcadia* also has the distinction of having

been early translated into French and having deeply influenced the sentimental romances of the next half century. Montemayor's *Diana*, which had influenced the *Arcadia*, was translated in 1598; and an imitation, Lady Mary Wroth's *Countess of Montgomery's Urania*, followed in 1621. That the "sweetness long drawn out" of this pastoral-heroical tale was found so grateful on the literary palate of the seventeenth century is as strange to us as it is true; partly perhaps the fame of the Countess of Pembroke may account for it, but more the magic of the name of Sidney, immortalised by an early and heroic death before the book was published, a name which an Englishman even now rarely hears but he "finds his heart moved more than with a trumpet." But the French romances were even more popular, and the chief factor in the popularity of the school is rather to be found in the new elaboration of the theme of sentiment, more complex than the passions described in the Italian *novelle* or the purely heroic romances.

The mention of the last recalls our attention to the generation preceding Sidney. While the mediæval romances were still being reprinted for old-fashioned readers, a newer group had sprung up on the Continent and reached England when one would expect them to, that is not until the countries of their origin were wearying of them, and were ready to enjoy their condemnation to the flames by Don Quixote's housekeeper. It is true that extracts from *Amadis de Gaule* were translated as early as 1567; but the beginning of this fashion in England was the translation of Diego Ortuñez de Calahorra's *Espejo de Principes*, which began in 1578 and was not completed till 1601; in 1588 the Amadis and Palmerin cycles began to be translated with bewildering rapidity and profusion; *Bellianis* came in 1598, and imitations were soon put out by Markham, Middleton, and Forde. Forde's three absurd romances were *Parismus*, with its sequel *Parismenos*, 1598-9, *Ornatus and Artesia*, 1607, and *Montelion*, of which no edition earlier than 1633 survives. They were all popular, *Parismus* being printed over twenty times before 1740, and a third part was added not much before 1700. It is noteworthy that their heroes come from far afield,

distance being favourable to the marvels of romance. *Parismus* was "the renowned Prince of Bohemia," the scene of the History of Ornatus and Artesia is laid in Phrygia, and Montelion, Knight of the Oracle, was "son to the renowned Persicles, King of Assyria." Even Forde's absurdities, however, were exceeded by those of Richard Johnson, whose most famous *History of the Champions of Christendom*, appearing in 1596-7, two years before *Parismus*, held first place in the estimation of simple readers well into the eighteenth century.

Romance, which expresses the desire to escape from real life, was suffering eclipse, or rather, perhaps, running into new moulds; the novel, which represents an acceptance of real life, was being born. There had been an element of realism in the Italian *novelle*, but the old contrast of tragedy, which represents men as better than they are, and comedy, which represents them as worse than they are, was now strikingly seen in the contrast between the impossible hero of romance and the impossible rogue of the picaresque novel. The origin of the picaresque is an enquiry not to be undertaken here. In England, the first signs of it are to be seen in the welcome accorded to the jests of Skelton, Scoggin, and Eulenspiegel, and Harman's *Caveat for Common Cursetors*. But these were only slight things, evidence that the public was ready. The celebrated Spanish story of *Lazarillo de Tormes* was licensed in 1568-9, and went through many editions; a second part followed in 1596, and another, "The Pursuit of the History," by Juan de Luna, in 1631. *Lazarillo* produced a clever imitation in Nashe's *Unfortunate Traveller*, published in 1594, in which the rogue's adventures are laid in Italy, and mixed up with romantic legends about the poet Surrey and his fair Geraldine. Nashe's book is an interesting and individual performance, but produced no imitators. Rabelais' *Gargantua*, probably regarded with the same eye as the jest-books and picaresque stories, was licensed in 1594, but no copy is known, and Urquhart was not yet born. In 1622 and 1623 two more Spanish books were translated and published here, Cespedes y Meneses' *Gerardo* and Aleman's *Guzman de Alfarache*.

Gerardo was only revived once, in 1653; but *Gusman*, or, as he was more often called, the Spanish Rogue, had a long life and a numerous progeny. He was reprinted in 1630 and 1634, epitomized in 1655, and again reprinted in 1656 and 1661, and newly translated in 1707 and 1708. In 1652, George Fidge published his work "The English *Gusman*; or The History of that Unparallel'd Thief James Hind"; Hind was the celebrated highwayman who had been hanged the year before, and whom another pamphlet calls the Yorkshire Rogue. In 1665 Richard Head, the biographer of the celebrated Mother Ursula Shipton, produced the first part of *The English Rogue*, which was continued and ultimately completed in five parts by Francis Kirkman, the bookseller. This book continued the exposure of thieves' life and language which Greene and Dekker had begun in pamphlets not noticed here, and enjoyed a popularity far beyond its deserts. Seven years later the French imitation of *Gusman*, by Charles de Fieux, "The French Rogue, or The Life of Monsieur Ragoue de Versailles," was translated, perhaps by John Shurley, and twice reprinted by 1704. *The Dutch Rogue* of Lebechea was translated in 1685. In 1706 came "The Scotch Rogue, or the Life and Actions of Donald McDonald, a Highland Scot." There was an Irish rogue, by name Teague O'Divelly, and *Howleglas* was reproduced in 1720 as *The German Rogue*.

These early attempts at realism, working side by side with the idealism of romance, culminate in the last decade of the sixteenth century in a very curious product, not the least fruitful even of that time. This is the democratisation of fiction in the trade-novels of Deloney, Johnson, and others. The romances, old and new, were at least expensive from their mere bulk, and they were probably also above the heads of the commonalty. Euphuism and Arcadianism were essentially courtly fashions. The men of the new school were men of the people; their corypheus, Thomas Deloney, was "the balletting silk-weaver of Norwich." They knew the popular need, and they met it. Deloney's tales approximate to the jest-book type, but they tell the stories, not of rogues, but of the great names of the shoemakers' and clothiers' trades; Valens glorifies Hawkwood as a member of

the Merchant Taylors ; Johnson tells the stories of the Nine Worthies of London ; Roberts, those of the Six Merchants of Devonshire ; the story of Dick Whittington, of which no edition is known till 1656, may have originally belonged to this group ; Robin Hood and George a Green are heroes after the people's own heart ; Johnson's Tom a Lincoln is King Arthur's son and the Red Rose Knight, but is no more aloof than Robin Hood. *Faustus* and *Friar Bacon* combine the jest-book, the story of wonder, and the pious warning ; no wonder that they were popular. The level of literature in these books may not be high. An educated taste soon wearies of them, except in the terrible climax of *Faustus* or *Friar Rush*, or, for humour, in the Slawkenbergian story of Margaret's wooing in *Thomas of Reading*. But the prentice at the shop bench had not an educated taste ; and we may be sure that he often had *The Gentle Craft* or *Jack of Newbury* on his knees under the table and read it when his master's or mistress's eye was not on him, and would in the intervals turn back to drudgery with the delightful dream of following in the footsteps of those heroes of his craft.

The first third of the seventeenth century produced few notable English books ; we have some share, perhaps, in the *Euphormion* and *Argenis* of John Barclay, a cosmopolitan Scotsman of the type of the admirable Crichton, though they were first published abroad and in Latin. The *Argenis* is the starting point for the political romances of the next generation. But a few outstanding books, apart from the Spanish rogues, were translated in the reign of James I. Don Quixote began to appear in 1612 and was completed in 1620, perhaps in 1615 ; it is pleasant to think that Shakespeare, in his retirement at Stratford, may have read the first part at least. The *Exemplary Novels* followed in 1640. Both took firm hold of the English reader. The *Decameron*, long over-due, was translated in 1620-25 ; it was several times reprinted, and in 1702 was, as the title-page phrases it, "adapted to the Gust of this present Age." Richard Bernard's *Isle of Man*, 1626, a legal-religious allegory, acquires some importance in the light of Bunyan's allegories ; and Reynolds' celebrated

collection of deterrent stories, *God's Revenge against Murder* (1621-3) enjoyed great popularity; it was perhaps suggested by Beard's *Theatre of God's Judgments*, which had appeared in 1597. But the political strife that was to end in the Civil War was more and more distracting men's minds from such frivolities as romance-writing, and we find that, though the old favourites went on being reprinted, the output of new tales between 1630 and 1660 was by comparison very slight.

Of original writing from 1630 to 1650 there was extraordinarily little. Bishop Godwin's *Man in the Moon* appeared in 1638, and is perhaps the first philosophical romance; Richard Braithwaite published three novels in 1640 and 1641; Howell's *Dodona's Grove* and Hart's *Alexto and Angelica* both came in 1640; after these until 1650 there is only Baron's *Ἐρωτοπαίγνιον*, 1647. There was, however, a rather larger bulk of translation. Cervantes' *Exemplary Novels* were translated and printed in 1640; Machiavelli's *Belphegor* in 1647, and a number of less important tales, such as those by Bishop Camus, Biondi, Perez de Montalvan, and Boisrobert. In 1647 a more definite group of romances began to invade England; these were the artificial and enormously long French stories, pseudo-historical, pseudo-pastoral, pseudo-heroic, pseudo-romantic. The first to come was Gomberville's *Polexander*; in 1652 it was followed by the first instalments of Calprenède's *Cassandra* and *Cleopatra*, and by Mademoiselle de Scudéry's *Ibrahim*; in the next year began the latter's *Artamenes, or the Grand Cyrus*, in 1655 her *Clelia*, in 1662 Calprenède's *Pharamond*, and so late as 1677 Mademoiselle de Scudéry's *Almahide*. From 1652 to the first two or three years of the Restoration these books, appearing part by part, loaded the press; and country ladies like Dorothy Osborne found not only leisure and patience but also interest enough to read and discuss them. What that literary "man in the street," Francis Kirkman, who was moreover an expert in romances, thought of them, may be seen in his dedication to his translation of *Clerio and Lozia*, 1652: "No Nation ever could glory in such Playes, as the most learned and incomperable Johnson, the copious Shakespear, or the ingenuous Fletcher

compos'd; but I beleieve the French for amorous language, admirable invention, high atchievements, honorable Loves, inimitable constancy, are not 'to be equalled." Naturally their success produced some imitations. Roger Boyle's *Parthenissa* was commenced in 1654, and never finished; "the bluidy Mackenzie" published in 1660 the first part of his *Aretina, or the Serious Romance*, but, becoming immersed in matters of even greater seriousness, published no more; in 1664 John Bulteel produced his *Birinthea*. The French romances were moreover turned to edification by Nathaniel Ingelo in his clumsy allegory of *Bentivolio and Urania*, 1660, which took the public fancy enough to reach a fourth edition in 1682, and the historical element in them was turned to topical interest in two or three political romances. Of these one, *Cloria and Narcissus* or *The Royal Romance*, 1653, is described on the title-page as being "imbellished with divers politicall notions, and singular remarks of moderne transactions," and Braithwaite's *Panthalia*, 1659, also called "The Royal Romance," was "a discourse stored with infinite variety in relation to State-Government."

If they produced imitations, they also produced parodies. Sorel's *Lysis or the Extravagant Shepherd* ridiculed the false pastoral as *Don Quixote* had ridiculed false heroic; it was translated so early as 1653, and was followed in 1656 by a native English parody, Holland's *Don Zara del Fogo*. But these did not prove fatal. There were some reprints of Calprenède and Scudéry in the seventies; *Cassandra* was even reprinted so late as 1725, and these romances figure in the lady's boudoir described in the *Spectator*. But their real triumph was over by 1680. Perhaps Subligny's *Mock-Clelia*, 1678, and Scarron's *Comical Romance*, 1676, may have helped their fall; but they fell by their own weight. Such an extreme of fashion must be followed by its converse; the picaresque burst out again, and the day of the romance in twelve folio books gave way to that of the duodecimo novel in a hundred and fifty pages. The first workers of this reform were Jean Regnaud de Segrais and the Comtesse de Lafayette, whose *Zaïde* and more celebrated *Princess of Cleves* were translated in 1678 and 1679. For the next twenty years novelettes flowed from

the press in a constant stream. Their authors imitated Madame de Lafayette's brevity, but they were not so well able to imitate her truth to nature or her delicacy. A large number are gross; and their grossness is rendered more offensive by the artificial courtliness of their manner. Indeed of these stories of intrigue very much the more readable are those "novels of the cloak and the sword," more often of Spanish than of French origin, in which the main motive is not in the successful climax of the intrigue, but in the vicissitudes and dangers of its progress. Some of the worst are historical, or relate to living persons, and retail scandals that were no doubt all as well known at the time as a few still are. And as well as novels in which truth masquerades as fiction there were those in which fiction masquerades as truth. In fact, in this generation biography and fiction are divided by such an indeterminate line that the present compiler has sometimes turned in doubt to the love passages for a test, and only included the book if they were narrated in detail.¹

But side by side with the story which was its own reward there was beginning to be a novel of ideas. The early attempts at this are scattered, but we can follow two threads, the allegory and the satire by a story of travel. The first allegory to appear in English was Caxton's version of Degulleville's *Pilgrimage of the Soul*, and Christine de Pisan's *City of Ladies*, 1521, San Pedro's *Castle of Love* [1548?], the *Hypnerotomachia*, 1592, and de Cartigny's *Voyage of the Wandering Knight*, in their different ways, contributed to the tradition. A much more influential book than any of these was Richard Bernard's *Isle of Man, or the legall proceeding in Man-shire against sinne*, a dull and over-elaborated allegory in legal phraseology, which may have suggested *The Holy War* and the trial in *Pilgrim's Progress*; it reached a sixteenth edition in 1683. In the middle of the century the spirit of allegory is seen in *Nova Solyma*, 1648, which has been rashly attributed to Milton, and is now known to be by Samuel Gott, and

(1) The authorship of many French novels of this period may be found in the bibliography which forms part 2 of *De l'Usage des Romans*, by "le Comte Gordon de Percel," i.e., Nicolas Lenglet du Fresnoy.

in Bayly's *Herba Parietis*, 1650, the title of which is worth quoting more at length: "Herba Parietis: or, The Wall-Flower. As it grew out of the Stone-Chamber belonging to the Metropolitan Prison of London, called Newgate. Being a History which is partly True, partly Romantick, Morally Divine. Written by Thomas Bayly, D.D., whilst he was a Prisoner there. Capiant qui capere possunt." A more regular allegory is Ingelo's *Bentivolio and Urania*, already mentioned as turning the long French romances to purposes of edification, which appeared at the height of their success, in the year of Restoration. Five years later Simon Patrick published his *Parable of the Pilgrim*, which was popular, reaching a sixth edition in 1687. Every older allegory has been called the origin of *Pilgrim's Progress*, even the never-translated *Colombelle et Volontairette*; and *The Parable of the Pilgrim* is not last of the claimants. Bunyan owes, perhaps, no more to Patrick than the central idea of *Pilgrim's Progress*, but it is hard to believe that he does not owe him that; and it is worth noticing that the three allegories which were alive when his tale appeared all disappeared before its advance within a few years, *Bentivolio and Urania* (which, however, probably fell with the fall of the books it was built on, and was never read at all by Bunyan's uncourtly public) in 1682, *The Isle of Man* in 1683, and *The Parable of the Pilgrim* in 1687. The first part of *The Pilgrim's Progress* itself was published in 1678, and the second part in 1684. Its success was immediate, and the booksellers' hacks did not neglect the opportunity. In 1682 one T.S. anticipated Bunyan with *The Second Part of the Pilgrim's Progress*, which also is "Exactly Described under the Similitude of a Dream"; the third edition of this was printed in 1684, when the imitation was no doubt superseded by the true second part. In 1692-3 appeared a third part, which enjoyed almost as great a popularity for a time as the first two, a thirteenth edition being brought out in 1738. It is anonymous when examined, but at a first glance seems to be attributed to Bunyan, his name being skilfully and prominently brought into the title-page in the words "To which is added the Life and Death of John Bunyan, Author of the First and Second Parts," in which strict

verbal truthfulness is combined with a strong *suggestio falsi*, the name John Bunyan being printed in very large letters. A parallel case to this is found in *Gillian of Croydon*, 1727, of which the title reads "The Pleasant and Delightful History of Gillian of Croydon. Containing . . . the tragical History of William and Margaret [and also, I may add, the celebrated ballad] Illustrated with suitable Cuts. The Whole done much after the same method as those celebrated novels BY MRS. ELIZA HAYWOOD."

Honest imitations followed in Dunton's *Pilgrim's Guide from the Cradle to the Grave*, and *Hue and Cry after Conscience: or the Pilgrim's Progress by Candlelight*, 1685, and an anonymous *Progress of the Christian Pilgrim*, 1700.

Bunyan's two other allegories had appeared between the two parts of *The Pilgrim's Progress*, *The Life and Death of Mr. Badman* in 1680, and *The Holy War* in 1682; both were often reprinted, but without becoming household classics. In *Pilgrim's Progress* the high-water mark of allegory had been reached, and (though we must remember *The Tale of a Tub*) Bunyan has had almost fewer followers than predecessors.

So with travels. The acknowledged masterpiece of the genre, *Gulliver's Travels*, had behind it a considerable ancestry. More's *Utopia*, not translated into its author's native tongue until 1551, was before its time. The seventeenth century was a more reflective period than the sixteenth; Europe began to have leisure to contemplate the new knowledge and the new ideas. We find the growth of intellectual romance corresponds. Political ideas appear in Barclay's *Argenis*, already mentioned; and satire is seen in *Mundus Alter et Idem*, attributed to Bishop Hall, which was published in 1609 and revived quite late in the century, and in Erycius Puteanus' *Comus*, Louvain, 1611, and Oxford, 1634, and in the licensing of Petronius in 1631. The *Utopia* was imitated by Bacon in his *New Atlantis*, posthumously published in 1626, by Hartlib in his discourse, devoid of narrative, of the island of Macaria, 1641, and by Harrington

in *Oceana*, 1656. Unknown but sublunary lands afforded good sport, no doubt, for constitution-builders and satirists; but Bishop Francis Godwin's *Man in the Moon*, 1638, and Bishop John Wilkins' *Discovery of a World in the Moon*, 1638, which is not a narrative, went further and were not without fruit; for the latter was translated into French in 1656, and probably suggested to "that famous Wit and Cavaleer of France," Cyrano de Bergerac, the idea of his satire *Σελήναρχια, or the Government of the World in the Moon*, which was translated in 1659 and again in 1687. To return to earth, another imaginary voyage, Vairasse d'Allais' *History of the Sevarites*, was translated in 1675 (and later reprinted as vol. 3 of *Gulliver's Travels*), Barnes' *Gerania* appeared in the same year; Schooten's *Hairy Giants* came some time after 1671, and Gabriel de Foigny's *New Discovery of Terra Australis Incognita*, under the name of Jacques Sadeur, in 1693; while satires on the Jansenists and the disciples of Descartes respectively were brought over to England in *A Relation of the Country of Jansenia*, 1668, by a père Zacharie, calling himself Louis Fontaines, and Daniel's *Voyage to the World of Cartesius*, 1692. But all these are pale beside the immortal *Gulliver's Travels*, which followed at the distance of a generation. Several voyages were published soon after *Gulliver*, but all were imitations by Grub Street hacks, now, as in the time of Bunyan, watching the public fancy. Bennet's *Memoirs of the Court of Lilliput, Written by Captain Gulliver*, 1727, *A Voyage to Cacklogallinia . . . by Captain Samuel Brunt*, also 1727, and McDermot's *Trip to the Moon*, reprinted from a lost Dublin edition in 1728, need only be mentioned as examples.

Allegory and satire had each produced a masterpiece not even now rivalled. The novel meanwhile was gaining ground as an instrument for the expression of ideas more subtle than either because more concealed. The first true masterpiece of the tale in which the ideas are presented to the mind only by implication is of course Defoe's *Robinson Crusoe*. But before the appearance in 1719 of the masterpiece, the necessary material had been gathered and the art to work in it had been practised by many hands. Realism of characterisation, incident and diction, was at first

found only in picaresque stories, and there in a more or less debased form ; in the middle of the seventeenth century everything else was put into the background by the artificial idealism of the French Court romances, but realism, when it returned to favour, was greatly reinforced by reaction, and in Defoe's day had been gaining ground for a generation. Defoe's literary reform was not to rebel against the conventions of Scudéry and Calprenède,¹ but to convert the mere dull probability of the contemporary tale into narratives that should not only convince, but should also fascinate. The line between fiction and falsehood is a fine one, and no man ever trod it with more agility than Defoe. That Swift could, had he chosen to be possible as well as probable, have made men believe in Captain Lemuel Gulliver's relation, is surely in some part because Defoe had seven years earlier made them believe in that of Robinson Crusoe. Nevertheless, in style, Defoe's debt to his predecessors is slight ; his own experience as a journalist explains his skill, even better than Swift's experience as a pamphleteer explains his. Nor can we find any clear origin of his happiest idea, any Robinsoniads before Robinson. He may have seen *The Isle of Pines*, 1668, attributed to Henry Neville, a dull little fiction, narrating how one George Pine and a few other persons had been cast on a desert island, and, multiplying with a rapidity worthy of Zola's *Fécondité*, had organised their society. There is no reason to think that this fugitive pamphlet influenced Defoe, but, as we have seen, the idea of imaginary travel was familiar at the time. The travel-story, the rogue-story and the philosophical story were the chief elements in his art. His larger contributions to the rogue story were to follow *Robinson Crusoe*, though he had served his apprenticeship for writing them in his earlier journalistic pamphlets on condemned criminals, and in *The Compleat Mendicant* ; moreover the genre had greatly increased in power and dignity with the advent of Le Sage, whose *Gil Blas* was by now to be read in English. It has been said that the good love to hear of nothing so much as of the

(1) This is the impression conveyed by M. Jusserand in his pamphlet *Le Roman Anglais et la Réforme littéraire de Daniel Defoe*, 1887.

wicked ; for the pious tradesfolk of his day Defoe's tales of guilt and his shallow moralisings were exquisitely calculated. But once, in *Robinson*, he gave expression to profounder ideas. A man, separated from other men, when once his material necessities are provided for, must think, and Robinson tells us, to our complete conviction, what his thoughts were. This conception of the spiritual growth of an isolated mind may possibly have been suggested by an Oriental tale. Abú Bakr ibn Al-Tufail's story of Hai Ebn Yokdan, which was published in Arabic and Latin as *Philosophus Autodidactus* in 1671, was translated from the Latin into English in 1674 "for a general service," and translated twice again, in 1686 and 1708, the latter time as *The Improvement of Human Reason*, besides being abridged and appended to a chap-book edition of Greene's *Dorastus and Fawnia* in 1696. As its Western titles show, this story is that of a mind isolated from birth, and its achievement of natural religion. The growth of this idea at the time may account for the story's evident popularity ; but that popularity, in spite of the abridgement of 1696, must have been among educated men. Defoe's public was not familiar with free-thinking ideas, and we find that natural religion appears only in Friday, and is combated by Crusoe, whose progress is all towards the Christian verities. Natural religion is for Defoe the religion of the natural man, but not therefore a criterion of truth. In short, if he was influenced by *Hai Ebn Yokdan*, it was by way of opposition. What is perhaps an echo of both may be found in the anonymous story of *Autonous*, 1736.

The doctrine of the noble savage, it may be mentioned, had been proclaimed by Mrs. Aphra Behn in *Oroonoko*, so long before Rousseau as 1688. The earlier half of this novel, turning on intrigue, is in the artificial French style of her other novels ; but, for the latter half, when the African prince is a slave to his inferiors, the authoress drew on her early experience in Surinam, and her evident sincerity almost conceals even the apparent absurdity of her theme. But Defoe, without her experience, had a genius for probability, and the delusion of the noble savage, if he knew of it, did not impose on him.

Like Bunyan and Swift, Defoe had no worthy successor, not even in his later self; but all three left their mark on later writing. The man with an allegory, a satire, almost any idea, to express could now express it easily and attractively in the form of a narrative; new ground was conquered for literature. But side by side with this newer growth, the old mundane story of incident and sentiment went on. On the one side Le Sage and the Spanish novelists developed the qualities of wit and truth to nature, without which the story of incident and adventure cannot rise high in the degrees of true literature; on the other hand, the French novel of sentiment found a master in Marivaux, whose *Paysan parvenu* (*Milord*) was translated in 1735, and *Marianne* in 1736-42, the English version of the latter being only known from the announcements in *The Gentleman's Magazine*. There is no reason to suppose that Richardson owed anything of his *Pamela* to *Marianne*, though he may have read it. We know how the immediate suggestion of the book came to him; but the similarity of the two books shows how, independently of consciousness, a current idea may enter the mind.

On the other hand, the circumstance that *Pamela* is written in a series of letters has been claimed as original in Richardson; but this is far from being the case. Though his early practice in writing love-letters for young ladies is enough to account for his choice of form, even if he had not originally set out to write disconnected letters, only adding the story as an afterthought, yet the novel by letters was well known before his day. Letters occur, of course, in Euphuus and the heroic romances; but they are not used for telling the story. The growth of biography in the latter half of the seventeenth century probably suggested the application of the method to fiction; but the most important single influence is to be found in the celebrated *Letters of a Nun to a Cavalier*, translated by L'Estrange in 1678, and doubtfully included here with the certainly fictitious sequels, *Seven Portuguese Letters*, 1681, and *The Cavalier's Answers*, 1683. In 1683 Mrs. Behn published her *Love Letters between a Nobleman and his Sister* (sister-in-law), and in 1686 appeared an anonymous love-story in letters,

Love's Posy. Mrs. Manley's *Letters*, 1696, reprinted in 1725 as *A Stage-Coach Journey to Exeter*, include a letter in imitation of the Portuguese Nun, by a Major Pack, and suggest Fielding's use of the road and its incidents. Her more characteristic *Court Intrigues*, 1711, and her follower Mrs. Haywood's *Bath Intrigues*, 1725, are in the same form. In 1702, Tom Brown wrote *The Adventures of Lindamira* in twenty-four letters; this was reprinted in 1713. Here was tradition enough.

But these, except the Nun, were small achievements. The success of *Pamela* in 1740 opens a new chapter in the story of the English novel, and closes our period; but the more virile, if less subtle, story of incident was also to find its great reformer. Curiously enough, the masterpiece of one style was to be the opportunity for that of the other. Richardson's *Pamela* was made to be parodied, and its parody followed close in Fielding's *Joseph Andrews*. But it was only a parody in its inception; when once its author's genius had been drawn into the way of the novel, the future was secure. Yet the two opposed styles persisted. In France the Abbé Prévost fused these apparently discordant elements of strength and sweetness in his *Manon Lescaut*, 1731 (which was apparently not translated till much later); but no one heeded the example, at least in England. For that we had to wait for Scott.
